

# sentrax | BLE AoA Evaluation Kit

Sentrax AoA Evaluation Kit, exclusively designed for Testing, Demonstrations, Pilot Projects, and Evaluations

## Technology Overview

- Experience the power of **Sentrax AoA Evaluation Kit** firsthand. Our cost-effective and scale-able solution is easy to set up, with comprehensive customer support. Ideal for **smart buildings, healthcare, and manufacturing**.
- It includes environmental sensors and **Solix Suite Software** integration our evaluation kit provide an efficient and reliable way to track and manage resources with real-time data insights.
- AoA Evaluation Kit offers a sub-meter accurate real-time positioning experience with Bluetooth Angle of Arrival (AoA) technology, perfect for businesses looking to enhance their operations and improve overall efficiency.

## Evaluation Kit

- Advanced accurate Real-Time Indoor Tracking system
- Integrated climatic & environmental sensors
- Easy and fast out of the box RTLS deployment
- Easy online system configuration with data stream interfaces and reporting system
- Access to online support and training material
- Ideal for smart building, healthcare and industrial applications
- Offers precise real-time people/asset tracking and localization

## Evaluation Kit Includes:

**PINIX TOK-1**  
Quantity: 5

**ZENIX LON-2**  
Quantity: 3

**PINIX TOW-1**  
Quantity: 5

**SOLIX Suite**

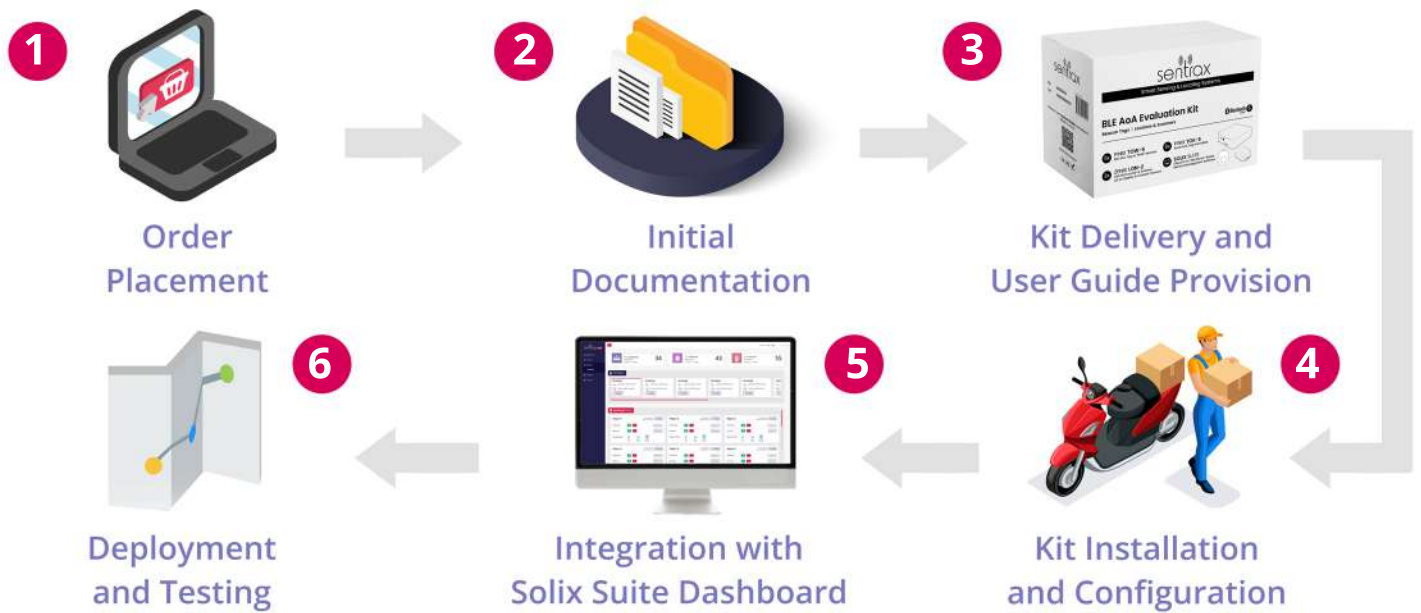

**ACCESSORIES**  
Connecting Wire, Batteries,  
POE Cable, Power Adapter  
Screws & nuts

**USER GUIDE**

# Deployment Guide (Step By Step)

## Benefits

### KEY BENEFIT

### DESCRIPTION

All-in-one package

The Evaluation Kit comes with all the necessary components and software required for easy deployment, making it easy to get started.

Environmental sensors

The BLE AoA Evaluation Kit includes environmental sensors, allowing users to monitor temperature, humidity, and other environmental data.

Cost-effective

The BLE AoA Evaluation Kit is an affordable solution for businesses looking to implement BLE RTLS technology without breaking the bank.

Complete solution

Sentrax offers a complete solution, including software (Solix Suite) integration, to provide a seamless user experience.

Scale-able

The BLE AoA Evaluation Kit is highly scale-able, making it suitable for businesses of all sizes, from small environments to large deployments.

MQTT integration

The Sentrax BLE AoA solution can interface with the user's MQTT broker, allowing for easy integration with existing systems and custom software solutions.

Customer support

Sentrax provides customer support through its forums and video support, ensuring users have the help they need when they need it.
