• What's New At Sentrax •

•Sentrax BLE RTLS: Next-gen hardware & middleware for seamless real-time tracking

•SOLIX RTLS & IoT Management Platform: Integration gateway to connect RTLS with enterprise-level applications

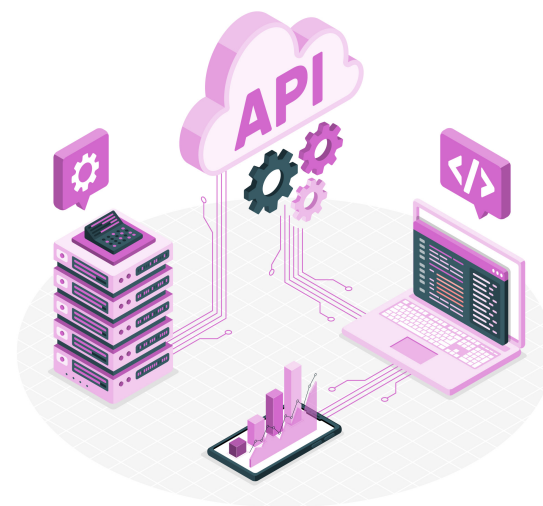

•Sentrax BLE RTLS Evaluation Kits: Powerful RTLS packaged for instant evaluation

Sentrax BLE RTLS High-Accuracy, Cost-Effective Indoor Positioning

At Sentrax, we continue to push the boundaries of location intelligence with our BLE based RTLS. Our cutting-edge hardware—featuring Angle of Arrival (AoA), RSSI, and hybrid technologies—is engineered for precision and scalability. Backed by our in-house developed middleware, Sentrax BLE RTLS ensures real-time asset and personnel tracking that integrates smoothly into existing infrastructures. Whether deployed in healthcare, manufacturing, or logistics, our solution is designed to perform reliably in the most demanding environments.

SOLIX: Integration gateway to connect RTLS with enterprise-level applications

SOLIX is the brain of the Sentrax ecosystem—a powerful RTLS management platform that enables seamless integration between our BLE RTLS infrastructure and higher-level applications such as ERP, MES, CMMS, or safety systems. With a user-friendly interface, advanced API capabilities, and flexible data visualization tools, SOLIX empowers enterprises to unlock actionable insights, automate workflows, and improve operational efficiency through real-time location data.

Sentrax's BLE RTLS Evaluation Kits Powerful RTLS Packaged in a box!

Our Evaluation Kits provide everything needed to get started—Available in BLE AoA and BLE RSSI. Packed with AoA scanners/RSSI scanners, asset and personnel tags, mounting accessories, and access to our middleware and Solix platform.

Sentrax's BLE AoA Evaluation Kit

Sentrax's BLE RSSI Evaluation Kit

Designed for quick setup and rapid testing, the kits allow integrators and partners to validate real-time location accuracy, evaluate use cases, and explore seamless integration in their own environment—without the long lead times.
